

Vacancy Product Designer

SLIMDESIGN develops intelligent products, ranging from Internet of Things devices to smart mechanics. In our designs, we look for the bare essence and use an integral development process. We work closely with a Polish electronics developer and several UX- and App-developers and it allows us to develop complex products fast and efficient from idea to production. We do this for companies like Panasonic, Philips, Nike and ambitious start-ups.

We are looking for an experienced Product Designer to strengthen our team. The most important qualifications are:

- Technical design engineering education and knowledge of production technics,
- Minimum of 3 years' experience in the design of consumer products,
- Strong sense of design and a clear methodical approach,
- Able to help create a signature in design, detailing, graphics and visualizations,
- Good in generating a lot of ideas and concepts/design sketches in a short time,
- Excellent hand drawings, photoshop visualizations and CAD rendering skills,
- Expert knowledge of SolidWorks, KeyShot and Adobe programs,
- Affinity with technology (electronic products Internet of Things),
- Social, proactive, independent and a positive attitude.
- European nationality or in position of a EU work- and residence permit.

We use the payment and working conditions of the BNO (Association of Dutch Designers).

You can apply by sending e-mail (up to 10MB) with CV and portfolio to info@slimdesign.com. Please only respond if you meet the job requirements.
